SUMMARY

I'm a full stack engineer with over 5 years of experience building web applications that are fast, scalable, and genuinely useful. I've worked across startups and agencies, mostly using React, Next.js, Python, and AWS — and I've also spent a lot of time integrating with CMS platforms like AEM, HubSpot, and WordPress. I love working on products that make a real impact, especially in areas like sustainability and tech-for-good. I'm hands-on with both frontend and backend, quick to pick up new tools, and happiest when collaborating closely with designers, product folks, and other developers to build something we're all proud of.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, SCSS, Figma
 - **Backend:** Python, Flask, Django, Ruby on Rails, REST API, GraphQL
 - **DevOps & Cloud:** AWS (EC2, RDS, Lambda, Amplify), Docker, Nginx, CI/CD
 - **CMS:** AEM (HTL, Java), HubSpot (HubL, HubDB), WordPress Headless (WPGraphQL, ACF), Wix
 - **Databases:** PostgreSQL, DynamoDB, MySQL, MongoDB
 - **Tools:** Git, GitHub, GitLab, Agile/Scrum
-

WORK EXPERIENCE

Head of Engineering & Team Coordinator – Matinno

Jan 2024 – Present

- Lead development of SaaS Marketplace for sustainable materials using Next.js 14, AWS Amplify, and DynamoDB
- Driving Agile development with Scrum, leading sprint planning, daily stand-ups, retrospectives, and backlog prioritization to optimize efficiency and collaboration.
- Implemented search functionality using AWS Lambda

Freelance | Full Stack Engineer

Jan 2024 – Present

Headless WordPress with Next.js & GraphQL

- Developed SEO-optimized, high-performance websites using Next.js 14 + WordPress headless CMS.
- Configured WPGraphQL + Advanced Custom Fields (ACF) for flexible content management.
- Next.js, WordPress, GraphQL, ACF

HubSpot Development

- Built and customized HubSpot themes, modules, and templates using HubL and JavaScript.
- Integrated CRM workflows with HubDB, enabling structured content management.
- HubL, JavaScript, HubDB

Adobe Experience Manager (AEM) Development

- Developed custom AEM components and templates using HTL (Sightly) and Java.
- Created AEM dialog-based configurations for editors, integrating JavaScript clientlibs for real-time UI updates.
- HTL, Java, AEM, ClientLibs

Software Engineer – Siventh (Deloitte)

Apr 2022 – Dec 2023

- Backend Development: Led the creation of robust backend APIs using Python with the Flask framework, ensuring seamless data handling and efficient system functionality.
- Database Management: Utilized PostgreSQL for database needs, hosted on AWS RDS, to manage extensive user data and analytical metrics securely and efficiently.
- Frontend Development: Developed user-friendly interfaces using React and Next.js, enhancing user experience and engagement.
- Worked closely with Deloitte, our largest client, to deliver new features and resolve bugs quickly, ensuring satisfaction

Volunteer Full Stack Developer – AVC

Mar 2022 – Jun 2023

- Fixed bugs and implemented SEO features
- Worked with Ruby on Rails and JavaScript

Software Engineer – SBWorks

April 2020 – Mar 2022

- Built and deployed an MVP for an accounting platform using NextJs, Flask, and PostgreSQL
- Contributed to the development of an e-commerce platform for HobbyLink Japan, a leading online hobby retailer with over 120,000 active products utilizing Django Wagtail for content management and Python for backend services.
